

Pediatric Associate Dentist, Ottawa, ON

We are looking for a full time Pediatric Dentist to join our busy, innovative, state of the art practice. We are a privately owned dental office and we focus on giving the patients the best dental care possible. As a result of our high level of professionalism and positive office environment, our office is highly recommended by pediatricians and general dentists in the area and many parents look to our office as a first choice for their children.

This is an amazing opportunity to join us and grow as our practice expands to meet the demanding needs of Ottawa and the surrounding areas. Our doctors enjoy the support and respect of the workers in the office and whether you have been in private practice for many years or are a relatively new graduate from a pediatric program and looking for some mentorship from providers with experience in private practice you will enjoy being part of our team.

Office highlights:

- Opportunities for growth
- Strong emphasis on exceptional patient care.
- Access to General Anesthesia.
- Practice uses Nitrous Oxide and Moderate Oral Sedation with monitoring by a registered nurse
- Collaborative and supportive working team environment
- Access to mentorship from experienced Pediatric Dentists

Our goal with our staff is to provide support for each person individually as we work together as a team. Family is also important to us at Kids & Teens Dentistry. While we're at work, we focus on work. But when we go home, we focus entirely on our families. That's because we value family time as much as you do.

To learn more about our office please see our website at www.kidsandteensdentistry.com.

For more information, please contact Melody at melody@ktdentistry.com or 613-820-8830 ext. 243.
