

Coronation Dental Specialty Group is seeking an Oral & Maxillofacial Surgeon to join our busy and modern practice.

A surgeon who joins our group will be immediately busy with dentoalveolar surgery, implants/bone grafting, and anesthesia. Surgical scope can be expanded as desired; the ability to operate on major cases is available. Private patients are supplied and shared by the practice, without the need to develop a new referral base.

Established 30 years ago, our multi-specialty practice includes OMFS, Periodontics, Endodontics, Oral Pathology, and Medical Anesthesia. Cooperative cross-consultation between our doctors and sharing of knowledge are encouraged.

Coronation's main office is in Cambridge, Ontario, with six satellites in Waterloo, Guelph, Brantford, Stratford, Woodstock, and Goderich. The associate position will include one or more of these offices.

Candidates should be team players with strong interpersonal skills. In addition, they should have, or be actively pursuing, their specialty licensure in Ontario. Remuneration is competitive.
